Summary

Results-driven developer with experience in fintech systems, Django web applications, backend engineering, automation, and regulatory reporting. Proven ability to transform highly manual business workflows into production-ready systems delivering major time savings and efficiency gains.

Education

Sunway College, Kathmandu

Mar 2024 – Present

BSc (Hons) Computer Science with Artificial Intelligence

Experience

AI Automation Intern, Jyoti Bikash Bank

Feb 2026 – Present

Electronic Payment Transaction Report Project (NRB)

- Designed and developed a Django-based web application to generate Electronic Payment Transaction reports required by Nepal Rastra Bank (NRB).
- Automated a process previously handled by 4–5 operations staff over 7–10 days.
- Reduced reporting time to under 2 minutes with full audit trail, improved accuracy, and successful production deployment.

Merchant and User Transaction Reporting Project (NRB)

- Built a reporting platform capable of generating 12 reports in a single run from large raw transaction datasets.
- Replaced a workflow involving 2 departments, 3 units, and 10–12 personnel.
- Reduced completion time from approximately 1.5 months to 10–20 minutes.

Product Development Intern, Moru Digital Wallet

Dec 2025 – Feb 2026

- Integrated third-party APIs for internet service payments into Moru backend systems.
- Contributed to backend product development, service onboarding, and workflow enhancement.
- Assisted in testing, deployment, and optimization of service integrations.

Technical Skills

Languages:	Python, Java, PHP, SQL
Frameworks & Web:	Django, FastAPI, React, JavaScript, Streamlit
Machine Learning:	scikit-learn, MLflow, NLP, Feature Engineering
DevOps & Tools:	Docker, Apache Airflow, Git, Redis
Databases:	MySQL, PostgreSQL
Other:	Power BI, Pandas, Agile, Design Thinking

Projects

MLOps – Diabetes Prediction System <https://github.com/Ashokkoirala10/mlops-diabetes-prediction.git>

- Built an end-to-end MLOps pipeline for diabetes risk prediction with automated training, monitoring, and real-time inference.

Federated Learning Platform <https://github.com/Ashokkoirala10/federated-learning-platform-v2.git>

- Developed a privacy-preserving machine learning platform aggregating client model parameters while keeping raw data decentralized.

Innovative Smart Parking System <https://github.com/Ashokkoirala10/smart-parking.git>

- Built a smart parking solution using IoT sensors and computer vision for real-time monitoring and availability detection.

Achievements

- Runner-up, DAV CodeFest 2025 – Federated Learning Healthcare Project.
- Semifinalist, ICT Rising Awards 2025 – Federated Learning Platform.
